

Dr. Zydowsky, Members of the Menomonie School Board

Feb.14,2022

I am afraid we have been hoaxed. At least according to the experts at the COVID19 Second Opinion forum organized by Senator Ron Johnson. It was a multi-layered deception including the CDC(with Dr. Fauci),social and mainstream media, big pharma, our trusted medical systems (ie. Mayo,) policy makers and cancel culture.

Here in Menomonie, it has certainly been evident by policies passed down by K.T. Gallagher from the CDC. I understand K.T. is hired by an administrator of our own Dunn County Board of Supervisors as a Public Health expert. This includes infectious diseases.

Early on in 2020, none of us knew a lot of what we now know about the disease. Remember we were told to social distance, isolate and stay home until your lips turned blue, wear a mask, wash hands, There was no apparent prophylaxis or cure.

What we now know (and really were suspicious of all along) is that the way to handle a virus is to stay home only when you have symptoms, boost your immune system by taking your vitamins (Vit. C, Vitamin D3, Zinc/Quercetin) If you have COVID, go to your doctor for treatment. Ivermectin and HCQ are safe, FDA approved and have been effective. Stay away from the hospital if possible. Don't wear a mask and be very leery of the so called vaccine. It is seldom effective and can be dangerous.

I will zero in on the 5-18 age group. This age group has high natural immunity. Masks are dangerous and unnecessary. They are about submission, not safety and they cause psychological harm. They also cause fear. Young children take social cues from facial expressions which are hidden by a mask. We saw indignant parents crying out on behalf of their children here in Menomonie. Why was our expert telling us lies about the handling of COVID?

In the past we trusted vaccines to protect from childhood diseases. This is not a childhood disease nor is it a normal vaccine. We have been duped. The experts tell us the jab has particular risks for children and adults in the reproductive age. These risks are often higher than the risks of the COVID itself. Think: VACCINE INJURED. Plus, we have never needed a "vaccine" for a disease that is treatable. We have been duped.

Why has Mayo in Menomonie tied the hands of its doctors from prescribing Ivermectin or HCQ? Why do they ask people to mask just to enter the clinic? This erodes our trust in doctors. Our teachers, parents and students in the Menomonie School system have groaned under ridiculous, unscientific policies. So I bring up K.T. Gallagher again. She seems to have been either deceived or complicit with the whole scheme. The gig is up.

Remember, policies built on deceit will not work out well.

We have another deceitful policy. It tries to tell us that education is about accepting what the culture calls fine and healthy. I am speaking of the Gender Policy Plan. Humans are born male or female. They will remain that way the rest of their life. Trying to change that will bring destruction. One kind of destruction it will bring is a destruction of the family which is a necessary building block for the whole community. We want our students in the SDMA to learn the discipline and character of how to form healthy, moral family units. No immoral or perverted sexuality should be tolerated. Remember, policies built on deceit will not work out well. We saw that with COVID19.

Respectfully,

Mrs. Josie Pillman
